

Motility proportion over time — All and by species

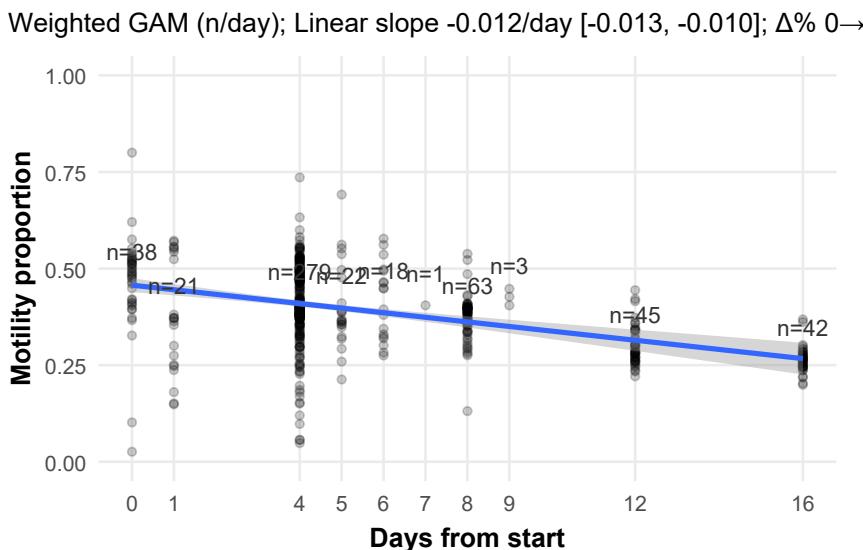

Each panel uses a weighted GAM (weights = n/day in that panel) with 95% CI; points show culture-level spread

All species

Weighted GAM (weights = total n/day) with 95% CI

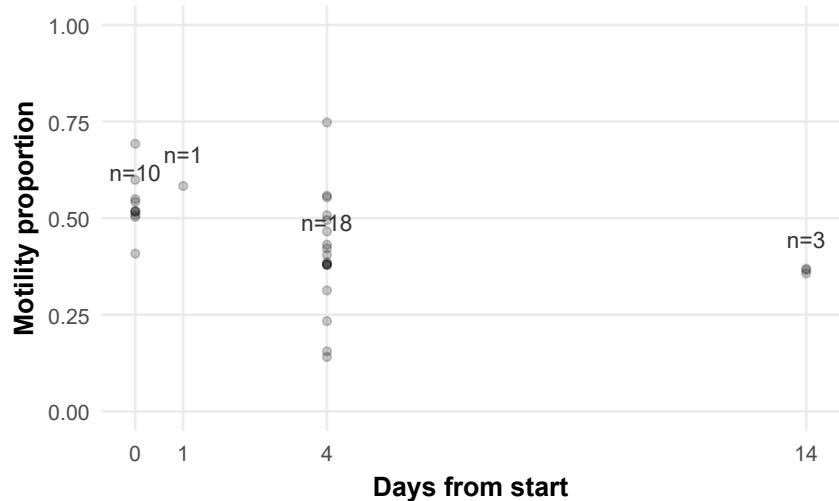

L. digitata

L. hyperborea

Weighted GAM (n/day); Linear slope -0.014/day [-0.026, -0.002]; Δ% 0→100%
Weighted GAM (n/day); Linear slope -0.008/day [-0.016, -0.001]; Δ% 0→100%

S. latissima

Weighted GAM (n/day); Linear slope -0.012/day [-0.020, -0.004]; Δ% 0→100%
Weighted GAM (n/day); Linear slope -0.008/day [-0.016, -0.001]; Δ% 0→100%
